

Faizy Jamal, UI/UX Designer

A passionate graphic designer who is now eager to move on to the next level of designing. I enjoy creating user-friendly visual designs for web/mobile applications. I relish taking on challenges and turning complex problems into solutions. I am profoundly deaf but with the help of today's newest technology including the Cochlear Processor and other advanced assistive devices I am able to hear and work independently. I strongly believe in my ability to perform and succeed in achieving my goals and produce best results.
